

You would not believe the amount of calls we received before this took affect. I really hope you consider all of us 3rd shift working americans before reverse this law. It is difficult to sleep in the daytime with all the noise but when the phone rings every half hour its almost impossible. My son is in school so I can't just turn the ringer off and sometimes these telemarketers call literally call every 20-30 minutes sometimes sooner. This became a big problem in my home all day long then when you answer a recording says please stay on the line and they expect you to wait for them to get on the phone. PLEASE FIGHT TO KEEP THIS LAW IN PLACE. Thank you.
